

# She's Got This Thing About Her

Chris Young

It might be your smile, cause it can change my day  
Blue eyes that chase my blues away  
It might be your touch  
That keeps me coming back for more  
Loving words that keep me going strong  
That heart of hers I hang my future on

What it is, well, I cant say for sure  
It's just she's got this thing about her  
she's got this thing about her

Like the magic in your favorite song  
You just can't put your finger on  
In her arms when we're all alone  
I get the feeling that I've come back home  
she's got this thing about her

She stops time when she moves through a room  
When she leaves she's always gone too soon  
And I'm counting down the minutes till she's back  
She's the love I've known eternally  
It always feels brand new to me  
I can't separate the fiction from the fact

It's just she's got this thing about her  
she's got this thing about her

Like a hymn in a cathedral hall  
Watching April snowflakes fall  
In her arms when we're all alone  
I get the feeling that I come back home  
she's got this thing about her

Like the magic in your favorite song  
You just can't put your finger on  
she's got this thing about her
