

## Crush

Clea

It was cold outside when you walked in  
How was I to know the way that I would feel  
You kissed me like a promise and  
From that moment on I realised that we'll

We'll be flying  
We'll be floating  
Just as long as you're with me

It's just a little crush  
But now it's turning into love  
I'm tripping on a world of everything  
With what your love brings  
It's just a little crush  
You know I can't give you up, who  
Who would have thought that our first kiss  
Could possibly lead to this

As natural as breathing  
You become a part of me  
I don't want this dream to end  
To touch you and to feel you near  
As far as this love goes  
To the sky and back again

We'll be flying  
We'll be floating  
Just as long as you're with me

It's just a little crush  
But now it's turning into love  
I'm tripping on a world of everything  
With what your love brings  
It's just a little crush  
You know I can't give you up, who  
Who would have thought that our first kiss  
Could possibly lead to this

Now everything is clear (clearer)  
I couldn't wish for anyone to love me better  
And I love to watch you move  
And I love the idea of loving you  
It's so easy to do

It's just a little crush  
But now it's turning into love  
I'm tripping on a world of everything  
With what your love brings  
It's just a little crush  
You know I can't give you up, who  
Who would have thought that our first kiss  
Could possibly lead to this

It's just a little crush  
But now it's turning into love  
I'm tripping on a world of everything  
With what your love brings

It's just a little crush  
You know I can't give you up, who  
Who would have thought that our first kiss  
Could possibly lead to this
