

# This New Year

Cliff Richard

I'm gonna find true love  
This new year

January blues  
The nights are dark and cold  
The heartaches are frozen so they hount you

February snows  
Abandoned cars and glowing fires  
Sunlight from a shining spire blinds you

Don't you depend on love that's here then gone  
Don't you look back to where the tears came from

This new year  
We're gonna make it work now and for a lifetime  
This new year  
Gonna spread the word and shout it from the rooftops  
Gonna find true love and cherish it, cherish it always  
This new year

Cool winds in the spring  
Blow the cobwebs out  
Take away the doubts with freedom

Hear this beating heart  
The feeling so alive  
With you right by my side I'll never die lonely

We must depend on love that's here to stay  
And Jesus loves you more than you can say

This new year  
We're gonna make it work now and for a lifetime  
This new year  
We're gonna spread the word and shout it from the rooftops  
We're gonna find true love and cherish it, cherish it always

We'll see a new revival call yeah  
We'll reach out to the broken ones  
We'll tell it to the world  
To every boy and girl that love has come

This new year  
We're gonna find true love  
Ooh cherish it  
This new year  
We're gonna make it work now and for a lifetime  
This new year  
We're gonna spread the word and shout it from the rooftops  
This new year  
We're gonna find true love and cherish it always  
This new year  
We're gonna reach out to this new year
