

# So Many Things

Cock Sparrer

Paradises ruined by violence in the sun  
Dictators ruling countries and killing everyone  
At home it's not much better, no Bobbies on the beat  
Just rages in the road and stabbings in the street

And I won't take this anymore

So many things in this world are wrong  
So many things I've put up with for too long  
The future is here, no better than before  
So many things I won't take no more

Everything's a mess and nothing will survive  
So many sacrifice just to stay alive  
But the experts are so clever, and they tell us what to do  
Religion never dies, it's born again for you

And I won't take this anymore

So many things in this world are wrong  
So many things I've put up with for too long  
The future is here, no better than before  
So many things I won't take no more

Operators put me on hold (So many things)  
Global warming but I'm still cold (So many things)  
Doctors say don't drink, don't smoke (So many things)  
Working longer but I'm still broke (So many things)  
Can't find anything on TV (So many things)  
But there's a thousand cameras watching me (So many things)

And I won't take this anymore  
Said I won't take this anymore

So many things in this world are wrong  
So many things I've put up with for too long  
The future is here, it's no better than before  
So many things So many things  
So many things I won't take no more
