

Goldmine

Colbie Caillat

If all I had was a dollar and your bright smile
I'd have a dollar more than I would need to get by
Cause I'm a billionaire if you count every sunrise
Wakin' by your side, and every good night
If all you had was the way that I love you
You'd have more honey than the honey bees in June
I'll keep you laughin', keep you smilin', keep your dreams true
Long as I have you, nothin' we can't do

Fly me back to the moon where you took me
The very first time that you kissed me
In the sweet starlight of your endless eyes when you lit this fire
Feels like we're sittin' on top of a goldmine
Flame so bright that it won't die
In a billion years it'll still be here cause our love is a goldmine
Yeah, our love is a goldmine
If everything we ever owned disappeared today
We'd build a castle in the sand somewhere far away
Don't need no money, no TV, don't need no microwave
Just the ocean waves, and the love we make

Fly me back to the moon where you took me
The very first time that you kissed me
In the sweet starlight of your endless eyes when you lit this fire
Feels like we're sittin' on top of a goldmine
Flame so bright that it won't die
In a billion years it'll still be here cause our love is a goldmine

We'll be rich in wrinkles, old and gray
When the risin' tide sweeps us away
Until then...

Fly me back to the moon where you took me
The very first time that you kissed me
In the sweet starlight of your endless eyes when you lit this fire
Feels like we're sittin' on top of a goldmine
Flame so bright that it won't die
In a billion years it'll still be here cause our love is a goldmine
Feels like we're sittin' on top of a goldmine
Flame so bright that it won't die
In a billion years it'll still be here cause our love is a goldmine

Yeah our love is a goldmine
