

# All For You

Cold Chisel

I get home and clean up, I put on my best shirt  
I put on my good shoes  
My arm are hard from what I do all day  
And it's all for you  
All for you

As I drive over by the steeple, by the hill  
The rain is gone, the night is new  
The constellations are coming out again  
And it's all for you  
All for you

It's all for you  
There are songs in the world  
I'm singing softly as I drive  
It's all for you cause you're the only girl  
And I'm young again  
And it feels so good to be alive

I'll take you out  
We'll find a place to eat  
Somewhere small, with a view  
And later on we'll go dancing if you like  
And it's all for you  
All for you

The old anger has given way  
To clear eyes and open hands  
I'm getting stronger with each new day  
Cause now I understand

It's all for you  
There are songs in the world  
I'm singing softly as I drive  
It's all for you cause you're the only girl  
And I'm young again  
And it feels so good to be alive

Yes it's all for you  
Oh it's all for you  
Oh it's all for you  
It's all for you  
Oh all for you
