

We Will Never Die

Condemned 84

Back in '83, frustration rose in me
All the gigs were packed, but the bands they just jacked
Oh frustration rose in me!

So we formed a band of our own
Played where we could away from home
Playing to the people we wanted to see
People on the street like you and me

We will never die, we will never die
We will never, we will never, we will never die! (2x)

Stick to your guns, never give in
Don't drop out for the trendy things
With your mates loyalty and the tools you trust
Come on, unite together with us

Like the rose, we'll never die
Because you know the reason why
The time will come when we have our say
Then the new breed will have their day
