

# Into The Light

Copyright

Just off a plane  
I already feel the strain  
It's not too funny in this heat  
Smells like off colour meat  
We're moving again  
Down in the depths  
You should have seen where I slept  
But if you knew me before  
I wasn't so hardcore  
You should have seen how I was kept

Chorus  
Now I'm stepping out into the light  
No time to wonder if it's wrong or it's right  
I've been hurting  
Hurting tonight  
Now I'm stepping out into the light

Up on the stage  
I just can't engage  
I feel slightly sick  
I ask myself, "What's wrong with me?"  
Life's what you make  
It's not just yours to take  
And with all of that sleaze  
You can take what you please  
But it gives you a heartache

Chorus  
Now I'm stepping out into the light  
No time to wonder if it's wrong or it's right  
I've been kicked down  
Kicked in the teeth  
Now I'm stepping out into the light

Go out on a limb  
Out where the lighting's dim  
Out where it hurts  
Out in the dirt  
Out where your wallet's thin  
Reach for the stars  
But, baby don't fall too far  
Dreams are to make  
Before you awake  
Where ever you are

Into the light 5X)  
Now I'm stepping out into the light 2x
