

# Hyena

Crippler

Let there be lions  
Let them free me from my skin  
Let there be water  
I wanna drown and touch the ground  
As I drink the water of this earth  
As I breathe the air in front of me

Live in fear  
Live in fear

Seek and you may find  
Reason to hide  
Among my own kind  
Let me be  
I'm falling towards the sun

This here is my solitude  
It stays with me  
My source of fortitude

I have seen through the Hyena's eyes

High I wanna fly  
To spread my wings, fall from the sky  
Deep I wanna dive  
To give in to the depths to feel alive  
Like a storm I'm comin' over you  
Like a wave take you away

Live in fear  
Live in fear

Look me in the eyes and see  
I need to be  
The godless creature  
Of your own monstrosity

We will kill that man  
His father and his son  
And when we're done  
We're gonna stand and stare  
at the sky

Fix me  
Fix me

Hold out  
Don't close your eyes  
We've come so far, not far enough  
We're dancing while they're coming  
for us

Fix me  
Fix me

I was given flesh  
I was given words

I am for shame  
As hurt is for the pain

I am a godforsaken consequence  
Of circumstance  
And though I do not own a thing  
This moment is mine
