

## Overcome

## Cryptic Slaughter

Time goes by as they feed the fire  
The future now shows us what's to come  
Vermin set in as they spawn the mire  
Yet we anguish and more is done

The infection continues to demoralize  
What is left will someday soon be nothing more  
Our water and air slowly deteriorate  
Just a mere shadow of what was there before

We've been overcome

Helping hand they wield a vice  
Degrade our lives to iniquity  
These are taxes hard at work  
So why aren't they helping me?

The toxins destroy consume malevolence  
And the politicians still can't compromise  
Future youth are put forth in this vile world  
In our society we still are brutalized

We've been overcome

Contamination  
It's our future  
Abomination  
We must rise
