## **Queen of the Night**

## **Crystal Ball**

She wakes from a dream Another sleepless night The moon throws its beam A silver ray of light

Her memory is just a scheme All she feels is fright The radio plays a theme From a strange old rite

Love she hoped to find Bloodshed is what she's got

She's a queen of the night From dusk 'til dawn she'll ride She's the queen of the night Came from the other side

Shadows start to gleam
Like the marks of her bite
She cries a silent scream
Can't resist his might

Love she hoped to find Bloodshed is what she's got

She's the queen of the night From dusk 'til dawn she'll ride She's the queen of the night Came from the other side

Eternal life
You give and take
Living among the damned
Will it never end?

She's the queen of the night From dusk 'til dawn she'll ride She's the queen of the night Came from the other side

She's the queen of the night From dusk 'til dawn she'll ride She's the queen of the night Came from the other side

She's the queen of the night
