

## Carry On

### Cuff the Duke

You can't break me down, you can't bother me  
Cause I'll end up living honestly  
I've told you once and I've told you twice  
If you're gonna move on you'd better take my advice

It should inform and it's a form of truth  
So pick up the pace, I'm not scared of you  
This struggle that we've had for years  
It matters this cause we always feared

You've seen in once and I've seen it twice  
Yea when in fact it's getting you right  
There's too much time and not enough to drees  
Let's pick up the pace so you'll get there

I've been stayin here to hold my breath  
And help you see it's so profound  
But I'm gonna be here to hold my ground  
To help you see what's so profound

I could feel you sense of disappointment  
I could tell you wanna be further along  
But it's not as bad as we once starred  
So we shout out the answers and we carry on

It's so much to see and not enough to be bad  
So let's speak of the place and walk me there

I'm gonna stay here and hold my ground  
In hell do you see what's so profound  
I gonna stay here and my hold my ground  
And help you see what's so profound
