

Night After Night

Cuff the Duke

Sad songs that fill the air
Broken hearts and nobody cannot care
The hard facts that we embrace
Because it's easier to never ever praise

We're in the middle of the tour delight
We can't afford to have an over side
It could inspire me for happy plans
We kick ourselves up, prepare for a race

I drew a break from the old god
We always felt and we couldn't get fucked
And I remember when it mattered
A lot more than it ever does now

We're in the middle of the tour delight
We can't afford to have an over side
It could inspire me for happy plans
We kick ourselves up, prepare for a race

You have to keep your head up night after night
You have to keep your head up cause it's too down
If you're gonna make it through the night

I can see you standing there
Looking sure that you're in the clear
And you can see that we're all around
Broken pieces on the ground

We're in the middle of the tour delight
We can't afford to have an over side
It could inspire me for happy plans
We kick ourselves up, prepare for a race

You have to keep your head up night after night
You have to keep your head up cause it's too down
If you're gonna make it through the night

You have to keep your head up night after night
You have to keep your head up cause it's too down
If you're gonna make it through the night

If you're gonna make it through the night
If you're gonna make it through the night
