You're a beacon in my darkest thoughts And I loved you so with all your wants All your poetry in rainbow shape Im so glad I got from what you gave Through the latest years we worried, so maybe that is why we let you go But our love is true and lasting, dear You will never leave our atmosphere Come back my friend with your soul We'll be one and the music we play will be great Come back again with your soul We'll have fun and you know well be jamming til late Some may choose to se what you did wrong but to me you were a source so strong You told me never to compare myself and that its good to be like noone else I'm your sister through eternity You have made yourself a part of me I will keep the music simple, friend Come on back and play it once again And the music never ends It's the heart that understands And its connecting me with you It's Friday night and I miss you friend It's Friday night, come on back again
