

Five Star Life

Damon Albarn

It's a five star life
It's a five star life
And if you live a life that's five star
Then you're gonna survive

It's a five star life
And everything you do had better be five star
It'd better be five star

Five star movie
A five star book
And if you write a five star song
Then you're gonna get treated like a five star

With a five star life
And a five star wife

Yeah I've met some five star people
And I've met some people who would never get
A five star life
Five star life

It's a five star life
And if you live a life that's five star
Then you've gotta survive

Five star doesn't mean you got lots of money
What five star means is you live a five star life
And people who are really five star
They're gonna be ten stars
