

A Song Can Be About Anything

Dan Wilson

A song can be about anything
About the second grade or the TV news
Or how the world turns around with or without you
Or how we first met in the strangest way
And how I followed you until you asked my name
Or how we must have been together in a life before
Or how you used to love me but you don't even know me anymore
How you used to love me but you don't even know me anymore
Or, or how you used to love me but you don't even know me anymore
(You don't even know me anymore)

A song can be about anything
About peace or war, or the sands of industry
Or the discontents of fame, or of obscurity
Or how we first met, on the warmest day
And how I had a plan to love someone until you came
Or how we survived unhappiness and sleeping on the floor

Or how you used to love me but you don't even know me anymore
Or, or how you used to love me but you don't even know me anymore
Or, or, or how you used to love me but you don't even know me anymore
(Don't even know me anymore)

I remember how we met on the warmest day
I had a plan to love someone until you came
A song can be about a dream of what we're waiting for
Or how you used to love me but you don't even know me anymore
Or, or how you used to love me but you don't even know me anymore
Or, or, or how you used to love me but you don't even know me anymore
Or, or how you used to love me but you don't even know me anymore
(Don't even know me anymore)

A song can be about anything
