

Variation

Dance Gavin Dance

We lie cold
Damn up the river we can go slow
We don't wanna know
Dull down our senses
Become numb

We take our time
Ignoring all the signs
Living in fear of our lies
Never bad enough to break it or good enough to feel right
Been in overtime half our lives

Under indecision
We become so dependent
On the rush of the moment
Sanitize my head

Death murders everything in sight
Beneath the rip in the wind, the pillar push you aside
If I, make way, I can taste your sigh
Just like the cannibal amp it knows sound is size
Push me to the brink I said,
Well that bitch is a creep, it tried to know what I think
To breathe out passion, or suck in fate
You think the world was made to wield your weight
And bleed out

Am I the reason that you can't look past your future self
Got me believing you been stuck and glued in frequent doubt
I know the feeling cause I can't keep my mind open now

Make up your mind
We're running out of time
Doubt is failure by design

I'm burning up
Can only take so much
I know you can feel it it's catching up
It's getting too heavy for both of us

We lie cold
Damn up the river we can go slow
We don't wanna know
Dull down our senses
Become numb

Mirin myself all by myself
Feel the caress so sweet done by my hand
Polishing this frame of mind,
Jacked it up an ax to grind
Duck 'n dodge, stay unaligned
My recognition face

Some get withered, some get fried
I know we talked about the shit we did each time

Polishing this frame of mind,

Jacked it up an ax to grind
Duck 'n dodge, stay unaligned
My recognition face

Am I the reason that you can't look past your future self
Got me believing you been stuck and glued in frequent doubt
I know the feeling cause I can't keep my mind open now

Am I the reason that you can't look past your future self
Got me believing you been stuck and glued in frequent doubt
I know the feeling cause I can't keep my mind open now
