Let Love Into Your Life

Dannii Minogue

Yeah, yeah, yeah, oh

You wake up on the wrong side of love
No one's talking and you feel you're walking
That castle you saw in the sky
Well, it fell like confusion raining into your life

Can't keep walking on the edge of time
Watching, hoping I can find a world that's right for mine
Underneath I let the reason slide but not this time
It's me who decides

Gonna feel that heaven inside
Gonna heal what's aching in the name of pride
I'm gonna take from silence the soul
And the voice that was clear but never told

You were right, you can fight
You can let love into your life
Don't lose sight of what's right
You can let love into your life

Oh yeah, ah, come on, now
Yeah, yeah, yeah, yeah

These shadows taken up from the sun
What life's missing can be slowly undone
This battle is just smoke in the air
Been giving it to me but baby, you don't play fair

Can't keep walking on the edge of time
Watching, hoping I can find a world that's right for mine
Underneath I let the reason slide but not this time
It's me who decides

Gonna feel that heaven inside
Gonna heal what's aching in the name of pride
I'm gonna take from silence the soul
And the voice that was clear but never told

You were right, you can fight
You can let love into your life
Don't lose sight of what's right
You can let love into your life

Is what we had gone?
Have the years, they've been far too long
Do the winds change you?

'Cause if I don't speak the war we make
What I don't say is for me to say
And I don't have the time
Yeah, yeah, yeah

Gonna feel that heaven inside
Gonna heal what's aching in the name of pride
I'm gonna take from silence the soul

```
And the voice that was clear but never told

You were right, you can fight
You can let love into your life
Don't lose sight of what's right
You can let love into your life

You were right, you can fight
You can let love into your life
Don't lose sight of what's right
You can let love into your life

You were right, you can fight
You can let love into your life
```
