

Starship Ride

David Gates

Lover, would you like to take a ride in a starship
It's like nothing you've ever tried
I could take you, closer to heaven than you'll ever get
It's a trip that you will never forget

Would you take a starship ride
Take you to the other side, of the moon
Where the nights are forever
We could go right by Mars
Make love among stars
You'll never see 'em shine so bright

Later, when we're tired out in space
We can stop by, we can drop by my place
I've got a little cavern, in the desert [?]
Mmm, when the sun goes down, it sure is pretty

Would you take a starship ride
Take you to the other side, of the moon
Where the nights are forever
We could turn the time machine on
Be back before we're gone
You'll never even see the dawn

Won't you take a starship ride
Take you to the other side, of the moon
Where the nights are forever
We could go right by Mars
Make love among the stars
You'll never see 'em shine so bright
