A Star Looks Down Tonight

David Hasselhoff

I feel her close, I swear it's true Yes, I feel right in this moment She looks down on you

From angel's land
Her tender hand is caring
'Cause a mother's love will never end

Daddy, tell me what is heaven like Where is Mummy? I wanna hold her tight

A star looks down tonight Shining down and burning bright Though she's gone away Where the angels play

A star looks down tonight Daddy's here and everything's alright And our love goes on With a simple song, on and on

Daddy say if I should pray Could I talk to her And tell her all my secrets

Baby, do if it pleases you Let your mother know We love her so completely

Daddy tell me what is heaven like Where is Mummy?
I wanna hold her tight

A star looks down tonight Shining down and burning bright Though she's gone away Where the angels play

A star looks down tonight Daddy's here and everything's alright And our love goes on With a simple song, on and on

Though she's gone away
Where the angels play
A star looks down tonight
Daddy's here and everything's alright
And our love goes on
With a simple song on and on
