

# Every Time I Get Around You

David Lee Murphy

Well I can feel those wheels start turin' 'round honey  
When ya walk into the room  
The rest of the world fades right off into the blue  
Yeah I'm off of the ground up in the clouds  
Not sure which one I'm on  
And I couldn't tell you what day it is baby  
Not when your in my arms 'cause honey

I forget about everything every time I get around you  
Girl it's like I got a one track mind all I wanna do  
Is stare into those big brown eyes  
It's almost like I'm hypnotized  
Every time every time I get around you

You'd think by now I'd learned somehow  
To keep under control  
But girl you're the kind that makes man just wanna let go  
I don't care about nothin' but your sweet lovin'  
When you look at me that way  
And sometimes when I'm holdin' you tight  
I can't remember my name 'cause honey

I forget about everything every time I get around you  
Girl it's like I got a one track mind all I wanna do  
Is stare into those big brown eyes  
It's almost like I'm hypnotized  
Every time every time I get around you

I forget about everything every time I get around you  
Girl it's like I got a one track mind all I wanna do  
Is stare into those big brown eyes  
It's almost like I'm hypnotized  
Every time every time I get around you
