

# Mistakes We Should Have Made

Dawes

You look at me through your red glasses  
While the yellow cab waits  
We've been thinkin' 'bout our soulmates  
Too long  
Let's take it all off, everything off

Not everybody gets to feel this way  
Not everybody gets stuck so bad  
We've been talkin' 'bout who we had  
Too much  
Let's cut to the wrong, let's get it up

If we start right now, we could figure out  
The mistakes we should have made  
We could hypnotize our wand'rin' eyes  
With the games we should have played  
The mistakes we should have made

I wanna [?] the rubble  
I want a future [?]  
I wanna make sure all my aces  
Get played  
A firework's gotta' crack before it fades

One hour gettin' off the books  
The one night that we could stand accused  
One night that we have to lose  
Control  
Let's settle the bill, let's rock 'n' roll

If we start right now, we could figure out  
The mistakes we should have made  
We could hypnotize our wand'rin' eyes  
With the games we should have played  
The mistakes we should have made

All of this nonsense past tense living  
All this [?] existence  
All these night shift what if questions  
These taboo rear view

If we start right now, we could figure out  
The mistakes we should have made  
We could hypnotize our wand'rin' eyes  
With the games we should have played  
The mistakes we should have made
