## **New Drug**

I lost my sight when I got stun I never bleeded so Do I slide into vice Till I'm gone?

You're like a dive into the wild Like poems Holding me as gentle As a new born child at night

Then sorrow breaks The silent spell My mind is clearing up And takes me back Into my shell Back to hell

I hope you Won't see me through Like I do I can't get You out of my mind I see still I'm blind I hope you Won't see me through Like I do I can't get Me out of this hug Just be my new drug **De/Vision**
