## A Brighter Star Than You Will Shine

## **Deacon Blue**

Down on the flag stones The accordians And sweet trumpets rise Rusty memories Of sin and doubting Mingle in around The Queen Street Traffic noise

Would that all the love in the world Watch me through the night

You know the preacher All he preaches is vanity Maybe, At last, You'll see A brighter star than you will shine one day

Hymns and words and busy planets Said the preacher have come and gone Even your smile will one day die away When your wealth and words are forgotten

Would that all the love in the world Stay with me tonight

You know the preacher All he preaches is vanity Maybe, At last, You'll see A brighter star than you will shine one day
