

## Mirroring Dimensions

### Decrepit Birth

Shadowed recess between the realms  
Living planes of existence  
Writing the song of creation  
Synchronized alignment of time

I feel my mind expanding  
Into the universe... I once created  
Synergy...  
Opening the psyche  
Beyond the pattern of thought

Into the pre-embryonic dream  
Eras of conception  
Images of creation  
Mirrored forever

Dreaming of existence  
Images... in context  
Rendered figments of thought  
Memories of what was to be  
Psychedelic awareness of the soul's eye  
The portal consumes my mind  
Altering perspective

Hallucination  
Dreams of life... death and rebirth  
Imagination  
Thought descends into self born

Destinies ellipse as light returns  
Retrograde of life begins again  
Awakening the pineal gland  
Spirit molecule of the mind's dream

Visions of many worlds  
Hearts beat in unison  
Spans of time...eternities  
Histories begin... origins end  
Eternal cusp of tomorrow  
The monochrome planes of a broken existence  
Under a shattered sky  
Reborn into the light of a new world
