Break Free

Decyfer Down

Found a hole and fell inside myself This emptiness by my own hand So constricted, self inflicted It's more than I can stand

Got to break free from this disease
In my core without a doubt I just want more
Life free from holes down deep inside
I need to find

I push to keep these walls from caving in Trying though I can't fill the space I had excuses, it never fuses It's hard for me to face

Got to break free from this disease
In my core without a doubt I just want more
Life free from holes down deep inside
I need to find
(2x)

Break Free

Got to break free Got to break free

Got to break free from this disease In my core without a doubt I just want more Life free from holes down deep inside I need to find (4x)
