

The Life

Decyfer Down

Drive tonight...without anywhere to go
Or place to call my home
Looking through time
I could see you...but never would feel you
The tears fell every time you refused me
This world always used me up inside
Never could find a true reason
To pass through this season

Now I gotta move on and survive
'Til I find "the life"

Never again
I'm gonna leave all this behind
I've found the better life
Never again
Believe me when I say my goodbyes
I gotta have the life!

I say goodnight...To all that I thought I knew
Now I know what to do
Seeing the world for the first time
It won't be the last time

Now I gotta move on and survive
'Cause I found "the life"

Never again
I'm gonna leave all this behind
I've found the better life
Never again
Believe me when I say my goodbyes
I gotta have the life!

So scream in my face
You're already late
Now I can say
This is all I'll take
You've beat me down
I'm standing my ground
Never gonna give in
Won't break but I'll bend

Now I've gotta move on and survive
'Cause I've found "the life"

Never again
I'm gonna leave all this behind
I've found the better life
Never again
Believe me when I say my goodbyes
I gotta have the life!

The life
The life
Gotta have the life!
