

Walk away  
Find your day  
You've got to dream on  
Take no sings  
Stand your crowd  
You've got to dream on  
Heal your heart broken  
Close your eyes for a while  
And dream on  
You've got to dream on  
Look up to the sky in silence  
Make sometime  
You've got to dream on

A girl without a smile  
A foe without a name  
Lost in place where the sun is always down  
Blessing in disguise  
Tell them it's alright  
You need a new dawn  
You've got to face the facts in time

Hold on to the last straw  
No time to dream on  
Holding on  
Days push on  
No time to dream on  
Lost your voice from shouting  
Hold your pose  
No time to dream on  
Stop the clocks and face the silence  
Make some time  
You've got to dream on

A girl without a smile  
A foe without a name  
Lost in place where the sun is always down  
Blessing in disguise  
Tell them it's alright  
You need a new dawn  
You've got to face the facts in time

Never wanted  
More than I could handle  
Never more  
Than I could handle

A girl without a smile  
A foe without a name  
Lost in place where the sun is always down  
Blessing in disguise  
Tell them it's alright  
You need a new dawn  
You've got to face the facts in time
