

# Sick And Tired

Default

I feel it  
This tension inside of me  
Pressure that's presently pushing down on me  
The first time  
It starts with just you and I  
Repeating myself but you don't hear me

I can see what you see  
But is it worth it to me  
The same old conversation  
Over and over and over  
I'm just sick and tired  
Of those lies you tell me  
You say those same things to me  
Over and over and over  
It's safe to say you surprise  
I see right through you this time  
But I keep telling you  
It's over it's over it's over

You've taken  
These things that belong to me  
Twisted so tightly and torn so carefully  
The last time  
It ends with just you and I  
Alone in a room with these torn bed sheets

I can see what you see  
And it ain't worth it to me  
The same old conversation  
Over and over and over  
I'm just sick and tired  
Of those lies you tell me  
You say those same things to me  
Over and over and over  
It's safe to say you surprise  
I see right through you this time  
But I keep telling you  
It's over it's over it's over

You swore I'd regret it  
Now thanks to you I can't forget it  
Cost of this constant battle  
Won't even miss you at all  
Free from this life that you call

I'm just sick and tired  
Of those lies you tell me  
You say those same things to me  
Over and over and over  
It's safe to say you surprise  
I see right through you this time  
But I keep telling you  
It's over it's over it's over

I'm just sick and tired  
Of those lies you tell me

You say those same things to me  
Over and over and over  
It's safe to say you surprise  
I see right through you this time  
But I keep telling you  
It's over it's over it's over
