

Step Back

Defiance

Step back and listen to what I say
Don't worry, put your trust in me
What to believe when your
Head's overfilled with these lies
The naked truth separates the people lost in time

[Chorus: Repeat 2X]
As if there's nothing to do
Reach back
And pull your past through
Step back and listen to what I say

What to believe when your
Head's overfilled with these lies
The naked truth separates the
People lost in time

I see the future. I see your life
I see you live your life on borrowed time
You live for your own morals
I do what I like 'cause this is my life

I do as I please
With no sacrifice
Guess what? Step back

[Repeat first verse, chorus]
Step back and listen to what I say
Step back
