

## Overhead

## Demians

They strive to be gracious  
You find a good reason for salting your wounds  
I'm none of the above  
So busy you are passing off ignorance as wisdom  
See me on your way down  
Wake me when you kiss the ground  
Falling from your cloud

Let's try to be truthful  
I found a good reason for salting your wounds  
Coming from above  
Save me on your way down  
Wake me when you kiss the ground  
I'm waiting for the rain to take me away

Now I know one day will come  
We'll walk as one under the same sun  
Raise your head up, forget the jury  
Become the rain and come dance with me

Now stop and look around  
When nothing's a given we laugh at your cries  
Above and beyond

An invitation to leave me alone  
As time passes by get back on your cloud  
See me on your way down  
Embrace me and we'll kiss the ground  
Wait here, wish for the rain to take you away  
Rain, please take me away

Been here, done that, and after all  
We all bow down before the same sun  
Raise your head up, forget the jury  
Become the rain and come dance with me
