

Still Worth Fighting For

Demon

Freedom
And a chance for a better world
Freedom
Tonight
Freedom
And a chance for a better world
Freedom
Tonight

Everywhere you go there's someone
Trying to put you down
They'll rip you off for what you got
Even mug you for a pound
Violence like a cancer it's a prehistoric age
The more we have the more we want
In these 21st century days
There is no discipline or values anymore
Respect so long ago went out the door
The jungles full of animals with gold dust
In their eyes while the ghost of past
Generations shed a tear

Still there's something that's worth fighting for
Still there's something that's worth living for

Streets are full of psychopaths and weird
And savage beasts
The system looks the other way
While the maniacs run free
It seems we've lost all decency
Our spirit and our pride
Cause we're all in for ourselves
Who cares who lives or die
But if you try and make a stand
You won't get far
Cause they own the strong arm of the law
Money talks and money walks everybody's got a price
As long as someone out there's still prepared to pay

Still there's something that's worth fighting for
Still there's something that's worth living for

Freedom
And a chance for a better world
Freedom
Tonight

There is no discipline or values anymore
Respect so long ago went out the door
The jungles full of animals with gold dust
In their eyes while the ghost of past
Generations shed a tear

We try and bring our children up to learn
Whats right and wrong
We give them things we never had but
Still they come on strong

It seems the world 's a frightening place
If your growing up today
Cause no one listens anymore
To what you have to say

But if you try and make a stand
You won't get far
Cause they got the strong arm of the law
Money talks and money walks everybody's got a price
As long as someone out there's still prepared to pay

Still there's something that's worth fighting for
Still there's something that's worth living for

Freedom
And a chance for a better world
Freedom
Tonight
