The Piper is Back

DemonLord

You are a victim Evolution dies Don't trust tomorrow Wait until past lies

Civilization
Turned off it's way
Insanity takes roots
On the path of decay

Never ever had a nightmare Never ever had a dream The human feelings Are always under the heel

Gotta find another reason Gotta find another way But never ever forget to pay

It's playing on you, it's playing on me You got what you wanted, you thought it was free You did leave the deal, and not realized Pay the price

It's coming for you, it's coming for me You wait on the anvil, and you do not see Today is the time You have to pay the piper now

No, there is no chance left to run away
He's coming up
No, there is no chance to make a delay
You gonna pay
No, there is no loophole you better pray
He's coming up
No, there is no chance, you die anyway
You gonna pay
