## Rush

## Demotional

So here we are once again, once again Pick up the pase and move forward Fear for the world that we're too late There's no way back Always on the run, this is our fate

It has begun We're on the run Always on the run

Faster There's no way to turn back Faster Are we trying in vain? Remember you're not alone You are not alone Almost there but it's always the same

I see the world in a blur, in a blur Rushing through life like a shadow And I feel that it's absurd There's no way back Things will never be like they were

It has begun We're on the run Always on the run

Faster

There's no way to turn back Faster Are we trying in vain? Remember you're not alone You are not alone Almost there but it's always the same

There's no way to turn back Are we trying in vain? You are not alone

Faster There's no way to turn back Faster Are we trying in vain? Remember you're not alone You are not alone Almost there but it's always the same

Faster There's no way to turn back Faster Are we trying in vain? Remember you're not alone You are not alone Almost there but it's always the same
