

# Nothing's Impossible

Depeche Mode

**Emi**                      **F**                      **Emi**  
1. Just give me a reason, some kind of sign  
**Emi**                      **F**                      **Ami**  
I'll need a miracle to help me this time  
**Emi**                      **F**                      **Emi**  
I heard what you said, and I feel the same  
**Emi**                      **F**                      **Ami**  
I know in my heart that I'll have to change

**Hmi**              **C**                      **Ami**  
R: Even the stars look brighter tonight  
                                 **Emi**  
Nothing's impossible  
**Hmi**              **C**                      **Ami**  
I still believe in love at first sight  
                                 **Emi**  
Nothing's impossible

2. How did we get to be this far apart?  
How did we get to be this far apart?  
I want to be with you, something to share  
I want to be near you, sometimes I care

R: Even the stars look brighter tonight  
Nothing's impossible  
I still believe in love at first sight  
Nothing's impossible  
Even the stars look brighter tonight  
Nothing's impossible  
If you believe in love at first sight  
Nothing's impossible

I still believe in love at first sight  
Nothing's impossible
