

# Nuclear

## Destiny's Child

You had your dreams  
And I had mine  
Eyes wide open and we dreamed together  
They wanna know how we keep our shit together

They're wondering,  
It's just evolution  
We're just getting better  
When the two become one  
On a quantum level

It's nuclear  
With you here  
There's nowhere left to run  
Why run? Why would you run?  
It's nuclear  
With you here  
We both heat up

Blow it all away (eh eh)  
Blow it all away (eh eh)  
Blow it all away (eh eh)  
Blow it all away (eh eh)

You had your half  
And I had mine  
But now there's no such thing as you and me  
I was so used to feeling incomplete

They're wondering,  
It's just evolution  
We're just getting better  
When the two become one  
On a quantum level

It's nuclear  
With you here  
There's nowhere left to run  
Why run? Why would you run?  
It's nuclear  
With you here  
We both heat up

Blow it all away

Anytime the climates change between us  
We share a bond they can't restrict, that can't be touched  
So amazing super power take over  
We'll never lose the energy

It's nuclear  
With you here  
There's nowhere left to run  
Why run? Why would you run?  
It's nuclear  
With you here  
We both heat up

Blow it all away (eh eh)  
Blow it all away (eh eh)  
Blow it all away (eh eh)  
Blow it all away (eh eh)
