```
You showed me all of your dreams
You showed me all of your fears
Now I see that your alone
```

Now I see that you fell apart again and I can see that we're near the end Now I see that you fell apart again and I can see that theres nothing left

You made it harder to feel You made me see everything Now I see that your alone

Now I see that you fell apart again and I can see that we're near the end Now I see that you fell apart again and I can see that theres nothing left

The nights go by as you slip away All these thoughts they're just a shade Tomorrow's gone so heres our song Before the light goes we'll stay long

Now I see that you fell apart again and I can see that we're near the end Now I see that you fell apart again and I can see that theres nothing left
