

Far Away

Deuce

Far away! Far away!

Don't tell me how you feel all alone
and how I can't be there for you now
when I say, I'm gone now when I fall
from this time I can see

I see the life was over now
see the things I've always missed
now I wanna say goodbye, but you!
Could only see me down so far
could only see me die this way
now I'm running far away, far away! Far away!

Don't tell me how I've lost what's inside
and all this dreams I've woke up to this
this nightmare I can't fight, can't see light
Is this heaven or hell

See the life was over now
see the things I've always missed
now I wanna say goodbye, but you!
Could only see me down so far
could only see me die this way
now I'm running far away, far away!

I can't find the words to say
still don't believe in faith
still feels like I'm late, I need you
take me through this we'll go, and find
another place where we can still be safe
where I can still be sane

See the life was over now
see the things I've always missed
now I wanna say goodbye, but you!
could only see me down so far
could only see me die this way
now I'm running far away, far away!
See the life was over now
see the things I've always missed
now I wanna say goodbye, but you!
could only see me down so far
could only see me die this way
now I'm running far away, far away!
