

# Keep You Close

dEUS

You were young, you had time on your hands  
And I, was a rollercoaster of the kind  
That needs to ride so high  
To dive so low  
All the time I had to keep you close

Now I finally know how it must of hurt  
To see all of the love and care only work  
A little while and then I'd go  
All the time I had to keep you close

What you feel is what you get  
You know there is no answer fit  
We broke the code so long ago  
I'm going to keep you ever close  
Just like on the day we met  
You pulling on me like a cigarette  
So like the sea holds to the shore  
I'm going to keep you ever close

Now the years have a way to make you forget  
That we're still in the same place  
No hurry yet  
The path we're on is the path we chose  
I'll still remember how to keep you close

Linger on, linger on in the scheme of things

We are only inhabiting our own dreams  
They don't come true, it's the way it goes  
And in the meantime I will hold you close

What you feel...

So is this what they mean about moving on  
Is this really the end you won't stick around  
The one that stays, you're the one that throws  
Out the one that has kept you close

And is this definition of constant change  
A transformissionof what we hope stays the same  
Cold's the breeze that forever blows  
Warm are the hands that have kept you close

Coldness is what lays ahaed  
So when I see you should I just pretend  
The flower's cut but it still grows  
I'm going to keep you ever close

Just like on the day we met  
I'm pulling on you like a cigarette  
So like the sea holds to the shore  
I'm going to keep you ever close
