

City Lights

Devics

Here, here
let's just stay here
you should love me here
here, here
let's just stay here
I should love you dear
When the wind comes
And the sun again my love
I'll be here
I found a way true
In silence with you
What do you hear
And what do you want to hear
Here, here
Get me out of here
Wake me under city lights
An apple and a kiss on my ear
Fly like days
Let time erase
All our mistakes
I found a way true
In silence with you
What do you hear
And what do you want to hear
