

I Will Never

Devlin

I will never, I will never let you
I will never, I will never say no
I just need to, I just need to be clear
Everything I ever had, will still be here
I just need to, I just need to be sure
Everything I ever need, catered for
I will never, let you

Take away what I've done to date
Let you, try and say I never changed the game
I will never, change myself in the race for fame
Let you, spit on my name, let you, shit on my name

There's no getting rid of me
I'm still leaving my legacy unconcerned by the jealousy
This verse is, more therapy, this burst is more energy
I can thrive of life will develop me
I will never let grime envelop me
Chew me up and then spit me out
Devs and Lewi White it's the old school recipe
Getting busy again, can't be stopped by a million men
Finally to Our Father your dead
Even I will never know what's next
Even I don't wanna place no bet
Wait and see what the brain concocts
Leave em shocked I'm tasering men
Until the day that I've got what I want...

I will never, I will never let you
I will never, I will never say no
I just need to, I just need to be clear
Everything I ever had, will still be here
I just need to, I just need to be sure
Everything I ever need, catered for
I will never, let you

I knew when Devs had his back to the wall
He'd find a way to recapture you all
Flying again I'm in a plane it's cool
But when I touch down it's hot for you all
The climate's rising and white lightening will keep striking live on the mic
at a fraud
Finding that I'm in the prime of my life in
This deep is a mighty thought
There's a mighty force
Inside of the man you see there will never be a man like me
Who will stand and be seen biting the bullet
Think that I'm Brandon Lee in this random dream a lantern beamed
And it all got dark and dank indeed
Then a phantom screamed
Get back in the booth with the team

I will never, I will never let you
I will never, I will never say no
I just need to, I just need to be clear
Everything I ever had, will still be here
I just need to, I just need to be sure

Everything I ever need, catered for
I will never, let you

Shit looks good for the future
I've got a dream like Martin Luther
That's why I'm the king of my castle can't be killed by blade or bazucka
I ain't knew to, this game you've seen me growing up inside your computer
My reign don't end when it rains it pours
It's the tutors tutor, back on track
The Devil In album made sure of that
Just pass me a mic and the floor reacts
Well alright let me write what the story lacks
A next chapter, coming like a Raptor hunting a poor relaxed
Fixed target, Van Pelt in Jumanji you can't ignore the facts, click clack

I will never, I will never let you
I will never, I will never say no
I just need to, I just need to be clear
Everything I ever had, will still be here
I just need to, I just need to be sure
Everything I ever need, catered for
I will never, let you
