

Stand Under My Love

Diane Birch

Somebody on the left
Somebody on the right
Somebody in the dark
Somebody in the light

They're harder than stone
Make you feel so all alone
The drugs don't work
There's too much hurt
Gotta find another road
Gotta bear the heavy load somehow

Big sky come crashing down
There has to be a place for us in this world
With a little shelter from up above
Little lies at every turn
I wanna be the face you trust in this world
When you need a little shelter
Stand under my love

Somebody in the right
Somebody in the wrong
Shaking hands with a devil mind
Paying for protection but there's none

Hand on my heart
When the future falls apart
And the fire won't burn
And the wheels won't turn
When there's not another road
We will bear the heavy load together

Big sky come crashing down
There has to be a place for us in this world
With a little shelter from up above
Little lies at every turn
I wanna be the face you trust in this world
When you need a little shelter
Stand under my love

Well the story is in stone
And the future may be known
When there's nothing left to say
I'll cover you, I'll cover you babe
Together we'll last for another day

Big sky come crashing down
There has to be a place for us in this world
With a little shelter from up above
Little lies at every turn
I wanna be the face you trust in this world
When you need a little shelter
Stand under my love
Stand under my love
