

Black Magic

Digital Daggers

Black magic
Always comes through
And it's coming for you

Be careful what you wish for
Careful what you say
Cause somebody might hear you
And you might get your way

Been calling on the heavens
Been calling on the graves
For everything you wanted
There's a price you gotta pay

Cause
Black magic
Always comes through
And it's coming for you

So tread a little lightly
and play a little safe
Say that you'll be good now
But it's a little late

Cause I know where you're kneeling
I know how you pray
Be careful what you're asking
Be careful what you break

Cause
Black magic
Always comes through
And it's coming for you

It knows what you're thinking
It knows what you've done
What's on it's way you could never outrun

Can't change your direction
You can't change your fate
You should've known just what was at stake

These special words that pass through my lips
The thunder and lighting from my fingertips
You should've known better
You should've known

Cause
Black magic
Always comes through
And it's coming for you
