

Out of the Fire

Digital Daggers

Out of the fire pulled me into your ocean
Out of desire pull me in
Bury me deep in your waves of commotion
Silence the fire within

Your siren's calling, it's so inviting
Your battle cries are hypnotizing
I'm under your spell
From heaven to hell
The in between is so intising

Hold me down and bring me peace again
Hold me under
Take me with you to the bitter end
Hold me under

Heavy my heart with your wish for survival
Tear me apart in the return
Swallow me whole, fill my lungs with revival
Quiet the chaos inside

Your siren's calling, it's so inviting
Your battle cries are hypnotizing
I'm under your spell
From heaven to hell
The in between is so intising

Hold me down and bring me peace again
Hold me under
Take me with you to the bitter end
Hold me under

Hold me down and bring me peace again
Hold me under
Take me with you to the bitter end
Hold me under

Found my salvation in raging waters
Flooding into me
In your temptation, your quiet thunder
Breaks me
Overtakes me...

Hold me down and bring me peace again
Hold me under
Take me with you to the bitter end
Hold me under

Hold me down and bring me peace again
Hold me under
Take me with you to the bitter end
Hold me under
