Sign Of The Times

Dispatch

Check me out before you go
Man you've got to really know
We've got this one to show
It's a sign of the times that you're here

All the love that you fear
Come right down and take you away

Soldier locket broken till
There's a letter on the sill
Guess you have more boots to fill
A sign of the times that you're here

All the love that you fear
Come right down and take you
Love that you fear
Come right down and take you away

Come down from where you are
Where you are
Come down from where you are
Where you are

Imagine that we're free to stay
No one ever gave you away
Thanks for being here today
A sign of the times that you're here

All the love that you fear
Come right down and take you
Love that you fear
Come right down and take you away
