

Under The Weather

Divine

You know me
I aint no cloudy weather
And when the sun dont shine ima make it better
Always
You know me
I aint no cloudy weather
And when the sun dont shine ima make it better
Always
Dont cry ima make it better
Open your eyes dont cry
Ima make it better
Always
Dont cry ima make it better
Open your eyes sunshine
Ima make it better
Always

Tell me what your feeling lately
You just cant keep it all
Locked up so deep inside
Its better just to let it go
Let my chest be your pillow
Keep you warm when you get cold
And when you start to fall
I wanna let you know
That we all have our reasons
They come and go like seasons
Summer, fall, through winter, spring
All the heart ache that they bring
Let this rain wash the pain away
I pray this love is here to stay
Been there in your heart from the very start
I swear to you im never leavin.

You know me
I aint no cloudy weather
And when the sun dont shine ima make it better
Always
You know me
I aint no cloudy weather
And when the sun dont shine ima make it better
Always
Dont cry ima make it better
Open your eyes dont cry
Ima make it better
Always
Dont cry ima make it better
Open your eyes sunshine
Ima make it better
Always

Ill be your cover, be your shelter
To protect you from the weather
Tell me what you need
Count on me to make it better
Call on me so late at night
Just to be your guiding light boo

So when the rain comes fallin
Ima be the one to catch you
Im gonna take my time with you
The storm is coming come inside
Ive been there too.
Nothin ever gonna hurt you
As long as im beside you
Hold my hand dont close your eyes im here
We're gonna make it through

Hey dont go
I wanna let you know
Hey dont go
Im gonna miss you so

You know me
I aint no cloudy weather
And when the sun dont shine ima make it better
Always
You know me
I aint no cloudy weather
And when the sun dont shine ima make it better
Always
Dont cry ima make it better
Open your eyes dont cry
Ima make it better
Always
Dont cry ima make it better
Open your eyes sunshine
Ima make it better
Always
