

Life We Know

Django Django

Catch a glimpse of your face in the mirror
Don't recognize, but I know we were closer than
The life we know
The life we know

Take the views from a place unfamiliar
And visualize everything even better than
The life we know
The life we know

Lift into mind
Stuck in rewind

Start the outline of your past life
Switching patients with your dark eyes
Conversations that we're taking
Have consequences still replaying
Premonitions of the next life
If you don't like it we can rewind
There's a rip in time, continue going through it
And leads us all into oblivion

Ooh
Ooh

Struck a chord and we tried to remember
When we were far overseas finding shelter from
The life we know

And the views that we found last forever
Just like the memories that brought us together in
The life we know
The life we know

Lift into mind
Stuck in rewind

Start the outline of your past life
Switching patients with your dark eyes
Conversations that we're taking
Have consequences still replaying
Premonitions of the next life
If you don't like it we can rewind
There's a rip in time, continue going through it
And leads us all into oblivion
