

Say Something

Django Django

The tables turned, you're on your own
Your bluff grew cold, a lonely song
The pressure's on, the faith is gone
The tea is strong, you took too long

To say something, we learned nothing
Still left wanting, now you're running away
Now you're running away

Please say something, we learned nothing
Still left wanting, now you're running away
Now you're running away

Same old song, lost it's meaning
Feelings gone, singing along, singing along
Same old wrongs, keeps us going
Feelings gone, singing along, singing along

Just say the word, try to be free
To find a place, live easily
If life's a church, I'm on my knees
Send me a sign and I'll believe

Just say something
Cause you meant something
We learned nothing
Still left wanting
Now you're running away

Same old song, lost its meaning
Feelings gone, singing along, singing along
Same old wrongs, keeps us going
Feelings gone, singing along, singing along

To say something, we learned nothing
Still left wanting
Now you're running away
Now you're running away
