

Learning Alive

DMA's

Never been so scared to be open
Knocking down walls through to more emptiness
Tomorrow is alive but it's broken
You gotta pull yourself together

Deeper than it grows in the moment
The colours of this life and the river it winds
Tomorrow is alive and it's spoken
All the worlds are spinning, all the world is spinning
All the world is spinning

And I just want to hold it together
How can I tell you we're getting better with time
And I'm on your side, I'm on your side
And I don't want to be here forever
How can I tell you we're getting better at life
And I'm on your side, I'm on your side

Never been so scared to be broken
Knocking down walls through to more emptiness
Tomorrow is alive but it's open
You gotta pull yourself together, pull yourself together
Pull yourself together

And I just wanna hold it forever
How can I tell you we're getting better with time
And I'm on your side, I'm on your side
And I just want to be here together
How can I tell you we're getting better at life
And I'm on your side, I'm on your side

Wait a minute more
Wait a minute more
Wait a minute more
All the world is spinning

And I just want to hold it together
How can I tell you we're getting better with time
And I'm on your side, I'm on your side
And I don't want to be here forever
How can I tell you we're getting better at life
And I'm on your side, I'm on your side
