

# Blood in the Water

Don Broco

Call your friends and your family  
I need all of your energy  
I need all of your energy  
I need all of your energy  
Now we're getting on swimmingly  
I need all of your energy  
I need all of your energy  
I need all of your energy, energy  
Charming, cheeky, funny  
Makes a really good impression kinda guy, you like  
Tells you what you want to hear  
Can't wait to go for drinks another time, alright

I swear we're all in this together  
I swear

But it was all a dream  
Hate to burst your, burst your bubble  
Tide swept us out to sea  
There's blood in the water, there's blood in the water  
Cause it was all a dream  
Starting, starting, starting trouble  
Don't you, don't you, don't believe that they're sorry  
Snakes on the ladder, impeccable manners  
Believe me, you don't matter

I, I, I  
I, I, I, I can't lie, lie  
I need all of your energy  
We've just got it that chemistry  
I need all of your energy  
You and me are the recipe  
I feed off of your energy, energy

I swear we're in this together  
I swear

But it was all a dream  
Hate to burst your, burst your bubble  
Tide swept us out to sea  
There's blood in the water, there's blood in the water  
Cause it was all a dream  
Starting, starting, starting trouble  
Don't you, don't you, don't believe that they're sorry  
Snakes on the ladder, impeccable manners  
Believe me, you don't matter

Always be there  
Count on me completely cause I'll always be there  
When what you want is what I want as well  
Let's stick together baby, life could be swell  
Always be there  
Waiting for the moment that you're under my spell  
Who can fight the feeling of a foe  
Who gets you where you need to go, oh, oh

Hate to burst your, burst your bubble

The tide swept us out to sea  
There's blood in the water, there's blood in the water  
Cause it was all a dream  
Starting, starting, starting trouble  
Don't you, don't you, don't believe that they're sorry  
Snakes on the ladder with impeccable manners  
Believe me, you don't matter
